SUMMARY

Detail-oriented Computer Engineering graduate and Web Developer with hands-on experience in WordPress, Shopify, frontend development, and technical troubleshooting. Experienced in building responsive websites, developing custom WordPress plugins and Shopify sections, implementing SEO enhancements, and converting Figma designs into production-ready websites. Strong background in both software and hardware systems, with additional experience in diagnostics, repair engineering, and workflow optimization. Fast learner with strong problem-solving skills and a commitment to delivering scalable and high-quality digital solutions.

WORK EXPERIENCE

- Repair Engineer, Wistron Infocomm Philippines**Aug 2023 - Aug 2025
- Led diagnostics and repair of high-complexity electronic components, ensuring quality standards and minimal rework rates.
 - Works with production and engineering teams to ensure device quality and performance.
 - Utilized schematics, board views, soldering tools, and test equipment for troubleshooting and rework.
 - Utilized advanced tools and methodologies for fault isolation, root cause analysis, and corrective action implementation.
 - Collaborated with cross-functional teams to streamline repair workflows and reduce turnaround time by X%.

SKILLS

- **Hardware & Engineering**
 - Microcontroller & Microprocessor Systems
 - PCB Layout & Circuit Analysis
 - Digital & Analog Electronics
 - Schematic & Board-Level Analysis
 - Hardware Testing & Validation
- **Repair & Troubleshooting**
 - Electronic Diagnostics & Repair
 - Component-Level Troubleshooting
 - Hardware Failure Analysis
 - Fault Isolation & Root Cause Analysis
 - Soldering & Rework Techniques
 - Defect Analysis
 - Repair & Rework Process Improvement
 - Technical Documentation & Repair Reports
- **PC & Technical Support**
 - PC Hardware & Software Troubleshooting
 - Operating System & Hardware Diagnostics
 - Hardware Installation & Configuration
 - System Testing & Validation

- Designed modern and responsive website layouts using Figma for UI/UX planning and prototyping.
- Converted Figma designs into responsive and production-ready HTML/CSS websites.
- Developed and customized WordPress websites using Elementor, Beaver Builder, Avada, and custom PHP functionality.
- Built custom WordPress plugins and implemented dynamic functionalities for client-specific requirements.
- Customized Shopify stores using Liquid, including reusable custom sections and theme enhancements.
- Implemented SEO improvements, schema markup, and website performance optimizations.
- Managed website maintenance tasks including backups, troubleshooting, security hardening, and malware cleanup.
- Collaborated with clients and teams to deliver scalable and user-friendly digital solutions.

SKILLS

- **Web Development**

- WordPress Development (Custom Plugins, Custom Post Types, ACF, Elementor, Beaver Builder, Avada)
- Shopify Development (Liquid, Custom Sections, Theme Customization)
- Responsive Web Design & Cross-Browser Compatibility
- Figma-to-Website Conversion

- **Programming & Frameworks**

- HTML5, CSS3, JavaScript, PHP
- Laravel, Node.js
- React Native (Basic Familiarity)

- **Backend & Systems**

- CRUD Systems Development
- JSON Data Workflows
- WordPress Custom Functions & Hooks
- Website Security & Access Control Implementations

- **Troubleshooting & Maintenance**

- Theme & Plugin Debugging
- Malware Removal & Website Cleanup
- Backup & Restoration Processes

- **Additional Knowledge**

- Version Control with Git & GitHub
- Vercel Deployment

EDUCATION

Bachelor of Science in Computer Engineering

President Ramon Magsaysay State University

Aug 2019 - Aug 2023

- Thesis on "Monitoring System for COE Laboratory Equipment".
